Dear Sir:

The applicants appreciate the indication that claims 1-35, 37, and 39-44 are allowable in the Notice of Allowability dated June 29, 2005. The following comments are submitted responsive to the Examiner's Statement of Reasons for Allowance.

Entry of the Statement into the record should not be construed as any agreement with or acquiescence in the reasoning stated by the Examiner. Each of the claims stands on its own merits and is patentable because of the combination it recites and not because of the presence or absence of any one particular element.

The Examiner's Statement was not prepared by Applicant and only contains the Examiner's possible positions in one or more reasons for allowability. Thus, any interpretation with respect to the Examiner's Statement of Reasons for Allowance should not be imputed to the Applicant.

Application Serial No. 10/446,256

It is also noted that while the Statement indicates that one of the elements in an allowable claim is a "flexible membrane separated by an atmosphere (air)", independent claim 28 recites a "gas" rather than "air" or "atmosphere".

Respectfully submitted,
